WHO IS THIS COURSE ADDRESSED TO?
Experienced advanced level officers or specialist level officers are the target groups of this course, as described in the “Framework for a harmonised programme for the training of document examiners in three levels” (Council Doc. No. 9551/07 and 16261/1/14, Annex II and III).

This course is designed for experienced document examiners who have completed the first level document course at the national level with at least two years’ service in the first line (first level). Participants should possess sufficient knowledge to establish whether a security document is genuine or not, basic knowledge on different types of printing and about the identity chain (identity registration/document issuance/document control), with a particular focus on the issuing systems for security documents. Officers must be capable of using compact document examination equipment.

The second level course will maintain the emphasis on the foundational elements of document and identity security and will add an extra focus on new technology and perspectives in the authentication of identities and documents, and in the identification of identity fraud.

WHAT ARE THE ENTRY REQUIREMENTS?
Member States select participants after a call for nominations for the profile described.
WHY SHOULD YOU TAKE THIS COURSE?
Upon successful completion of this training, you will be able to:
• work as advanced level document experts in Frontex joint operations;
• make decisions on the authenticity of a travel document;
• act as a national trainer on false documents.
You will be familiar with all the elements of the advanced level as described in Council Doc. No. 9551/07 and will be able to manage and resolve emerging complex, unpredictable and sensitive situations.

WHY SHOULD YOUR ORGANISATION NOMINATE YOU FOR THIS COURSE?
To enhance the detection of falsified documents at the borders and have qualified trainers at the national level.

HOW DOES THIS COURSE PREPARE YOU FOR THE JOB?
On successful completion of this course, you will have the following job competences:
• have knowledge or understanding of law and ICAO regulations in relation to ID and travel documents;
• be able to accurately use second-line document examination equipment and databases, describe the printing techniques, materials and safeguards in security documents, use the information coming from document examination as intelligence, compile detailed reports for referral to the appropriate person or authorities;
• take responsibility for making decisions on the authenticity and validity of documents inferred from examinations and communicate to the appropriate person or authorities in a coherent and accurate manner both orally and in writing, with the appropriate technical language.

WHAT WILL YOU LEARN ON THIS COURSE?
On successful completion of this course, you will have learnt to:
• gather, maintain and share accurate and relevant information and data whilst respecting the necessary standards for sensitivity and confidentiality, using a broad range of communication channels, systems and technology;
• identify and recognise the potential of information as intelligence, and to select and disseminate information accordingly;
• plan, organise and deploy border control and critically assess performance and evaluate results;
• describe a defined range of national, EU and international laws, policies, rules and procedures relevant to document examination;
• effectively operate the relevant equipment and technology available for border control and evaluate results;
• respect the fundamental rights of all persons in the context of all border guarding activities.
HOW WILL YOU LEARN?
During the first week of this course, a combination of lectures, demonstrations and practical exercises will be used to develop theoretical knowledge and skills necessary to detect false documents. You will explore different substrates, printing techniques, personalisation processes, and usage of different forensic equipment. You will become conversant with laws and regulations. During the lectures, you will have the opportunity to examine sample documents and see different reference materials.

The second week of the course is aimed at providing learners with skills in communication, writing reports, using equipment, accessing specific databases and investigating documents. A combination of theoretical and intense practical sessions will be used to develop these skills. You will learn how to identify and recognise document information (forged and/or falsified) as intelligence and to select, categorise and disseminate this information accordingly. This week builds on the theoretical parts of the course while giving you the opportunity to practise with real case documents and enhance your proficiency in the investigation of security documents.

At the end of this course, you will examine a security document and report your findings. Immediate feedback will be provided by trainers and peers. You will be able to set up your support network.

HOW WILL YOU BE ASSESSED?
You will undergo two assessments:
• The first will be in the form of a written test with multiple choice questions and open questions (MCQ/OQ) designed to ensure that you have assimilated the theoretical element of the course. The MCQ/OQ assessment tests your working knowledge of printing techniques and the general knowledge of the different substrates, printing techniques and security features. If you do not pass the MCQ/OQ test, you cannot move on to the practical assessment.
• The second assessment is a skill-based practical test. Feedback will be provided by two certified document specialists. This assessment has two parts. The first is a practical investigation of documents in combination with the usage of forensic equipment. The second is an oral presentation of the outcomes.

WHO IS THIS COURSE ADDRESSED TO?
This course is designed for Frontex and non-Frontex border and coast guard trainers, including:

• people with specific operational or subject matter expertise but without a range of specific skills in designing and delivering session content or assessing learners’ performance;

• people with specific roles in designing training content, but no experience in applying training delivery methods;

• people who are skilled in training design and delivery in their own organisations, but are unfamiliar with the regulations, policies and procedures associated with the delivery of Frontex training;

• people with limited knowledge of contemporary training delivery methods other than reading from Power Point slides;

• people who developed their content and delivery skills from a ‘teacher-centred’ rather than a ‘learner-centred’ perspective;

• people who are skilled at content design and delivering Frontex training, but are unfamiliar with Frontex and/or multicultural environments.

WHAT ARE THE ENTRY REQUIREMENTS?
English B2 (CEFR) level.
**WHY SHOULD YOU TAKE THIS COURSE?**
To enable you to design and deliver learner-centred training content in line with Frontex’s training standards.

**WHY SHOULD YOUR ORGANISATION NOMINATE YOU FOR THIS COURSE?**
It is recognised that in border and coast guard organisations the delivery of specific training topics is often the task of field experts rather than full-time trainers. Although the quality of training is greatly enhanced by using people with operational expertise, it is necessary to ensure that these experts also have the skills to transfer their operational competence to others. This course introduces learners to a variety of learning requirements within border and coast guard structures and complements and supports the delivery of Frontex training courses.

**HOW DOES THIS COURSE PREPARE YOU FOR THE JOB?**
This course will give you the autonomy and responsibility to continuously assess the quality of training and take the initiative to improve the content and delivery to achieve Frontex’s training standards.

Additionally, this course will enable you to:
- design, deliver and adapt learner-centred training content according to both Frontex’s training standards and different styles of learning;
- design and conduct formal and informal assessments of learning outcome achievement, including peer review and constructive feedback to learners;
- manage classroom activities, including group work, resolve problems and prepare contingencies;
- communicate effectively, respectfully and confidently with different types of learners and peers.
WHAT WILL YOU LEARN ON THIS COURSE?
During this course, you will learn to:
• plan the content and delivery of training activities with a learner-centred focus;
• selectively apply a range of learning methods, tools, techniques and communication skills to deliver training activities that respect the diversity of learners;
• assess learners’ performance, including peer review, ensuring the achievement of learning outcomes and the provision of constructive feedback;
• ensure the practical integration of specific rights across all elements of training;
• recognise Frontex’s quality standards and processes applied to EU Border and Coast Guard training.

HOW WILL YOU BE ASSESSED?
Assessments include:
• online facilitation of discussions;
• online tests of knowledge with confidence marking;
• design of a training session;
• delivery of a training session;
• a reflective log;
Each module has an online assessment component. The modules with contact learning phases adopt practical assessments related to session design and delivery such that both the method and feedback can be directly applied in the Frontex operational context.
All assessments will be conducted in accordance with the Frontex Quality Assurance policies and procedures.

HOW WILL YOU LEARN?
This course adopts a modular approach in order to provide the necessary knowledge, skills and competences with a flexible learning path that makes best use of recognition of prior learning (RPL) in accordance with Frontex’s Quality Assurance policies.
This course is delivered over three modules:
1. The Context of Frontex Training (25 learning hours)
2. Planning Frontex Training Sessions (41 learning hours)
3. Principles of Training Delivery (45 learning hours)
Learners are required to satisfy the learning outcomes of each of the preceding modules in order to progress to the next module.
The course adopts a blended learning approach in order to give learners a broad range of design and delivery methods. Module 1 is delivered through a virtual learning environment, while modules 2 and 3 involve face-to-face contact along with independent learning for knowledge acquisition and experiential learning for skills development.
